Personal Statement

Whom it may concern,

My name is Jacq Burns, a 3D Generalist with a passion for character and creature work. I bring a versatile skillset, shaped by two years in a high pressure production environment. Along with a degree in animation and art my background includes key roles at Revenant TV where I contributed to major projects and seamlessly adapted across departments, always stepping in where the pipeline needed support. Whether crafting a stylised character or a photorealistic creature, I aim to deliver assets that are not only visually striking but built for production. I thrive in a collaborative team, solve problems quickly and always strive to reach new heights. I appreciate the time taken to consider me for the role

Sincerely,
Jacq Burns
